

Did you know.....

We now supply the most sustainable soap system on the market and it's called Soap 2o

At Newline our Vision is to to make buildings safer and cleaner for all through innovative cleaning solutions and hygiene standards that are good for people and good for the planet, and we see Soap 2o as a great step forward with this.

Soap 2o say that there is no excuse to continue with the amount of single use plastic and have designed and produced a plastic free soap solution.

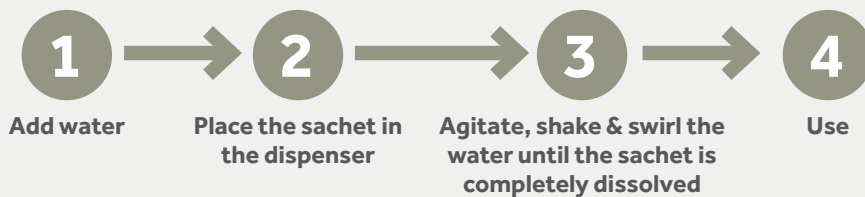

FACT:
A whole pallet of 5ltr Bulk Fill Soap can be replaced by just 4 cases of Soap 2o.

- 
Reduce weight
 by up to 99%
- 
Reduce shelf space
 by up to 92%
- 
Reduce transport cost
 by up to 90%
- 
Cut packaging
 by up to 70%
- 
No animal testing and vegan friendly
- 
Eliminate the use of single use plastic
- 
Smells amazing

That's great news for us (Less storage, less distribution and less carbon). And great news for you (more sustainable, less single use plastic, less packaging, less cost)

How does it work?

The products are easy to use.

The Soap2o biodegradable sachets have been designed so that the sachet can be easily placed within the dispenser. This ensures there is minimal risk of the concentrate encountering the user's skin or eyes. No manual handling is involved when using or moving the products before water is added.

The dosing is always correct which means that the active ingredients in the sachets will work at the optimum level and costs are fully controlled at the site level.

Please contact Newline for more details on how we can help you create Cleaner, Healthier more sustainable buildings.
